PROJECT ECHO SERIES OPIOID AND SUBSTANCE USE DISORDER

This Project ECHO consists of a five-part course for healthcare professionals. This program offers a unique opportunity to collaborate with peers, exchange ideas, and deepen your knowledge of evidence-based practices. Take part in discussions with industry experts to explore the latest advancements and tackle critical issues in the fight against substance use disorders.

Learning objectives for this ECHO series include:

- *Enhance Understanding:* Develop a comprehensive understanding of evidence-based practices in the field of substance use disorders, gaining insights into the latest advancements and key concepts.
- *Foster Collaboration:* Facilitate collaboration among healthcare professionals and stakeholders by providing a platform to share insights, discuss challenges, and exchange best practices related to substance use disorders.
- *Empower Action:* Equip participants with the knowledge and tools needed to make a positive impact in their communities by addressing substance use disorders effectively, promoting informed decision-making, and contributing to the creation of an empowered and supportive network.

This program is offered at no cost to participants through a grant from the Rural Communities Opioid Response Program-Overdose Response. Participants may receive continuing education (CE) credits for each learning session attended.
